Information and Communication Technology Tools in Learning Computer Science

Educational Institutions throughout the world are faced with the challenge of developing teaching approaches which can take advantage of new technologies and integrate these into the learning experiences of future generations. The interactive way in which information is stored, processed and presented can enable teachers and students to explore the model, to communicate effectively with others and present information effectively to different audiences. ICT in the education improve the engagement and knowledge retention. This is because technology provides different opportunities to make it more fun and enjoyable in terms of teaching the same thing in the different ways.
