

DEPARTMENTAL ACTIVITY PHYSICS

department of physics conducted national science day on 28-02-2018. all the science faculty and students of ttwrdc(b) manuguru participated on the program. science faculty members explained developments in science and its uses in everyday life.

department of physics conducted international science day on 10-11-2018. all the faculty and students of ttwrdc(b) manuguru participated on the program. science faculty members explained the new trends in science and peace among the countries

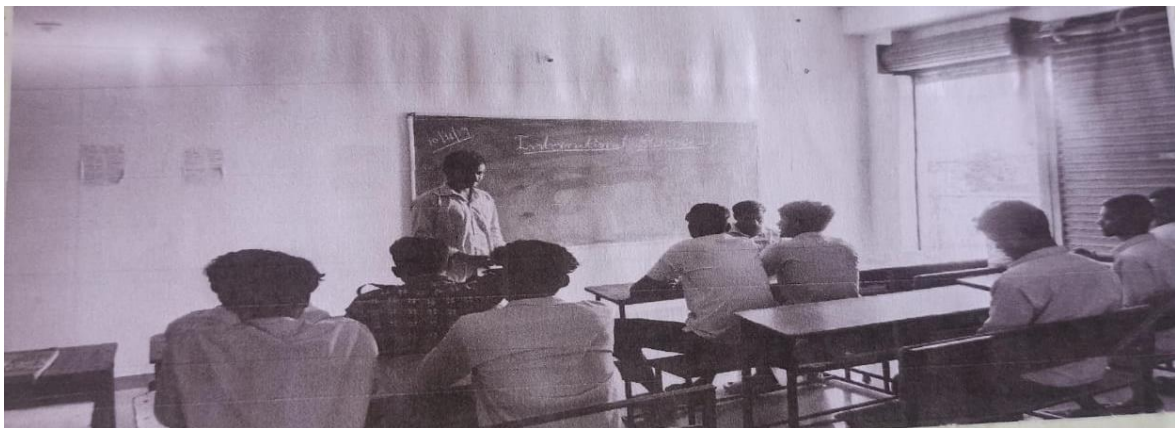

department of physics conducted national science day on 28-02-2019. all the science faculty and students of ttwrdc(b) manuguru participated on the program. science faculty members explained developments and achievements in science and its uses in everyday life

department of physics conducted meteorological day on 23-03-2019. physics faculty and students of BSc(MPC & MCPc's) participated on the program. physics faculty explained meteorology and changing climate.

department of physics conducted international science day on 10-11-2019. all the faculty and students of ttwrdc(b) manuguru participated on the program. science faculty members explained the new innovations in science and peace among the countries

department of physics conducted national science day on 28-02-2020. all the science faculty and students of ttwrdc(b) manuguru participated on the program. science faculty members explained developments and achievements in science

department of physics conducted meteorological day on 23-03-2020. physics faculty and students of BSc(MPC & MCPc's) participated on the program. physics faculty explained meteorology, hydrological changes.

department of physics conducted international science day on 10-11-2021. all the faculty and students of ttwrdc(b) manuguru participated on the program. science faculty members explained the new innovations in science and peace among the countries

department of physics conducted national energy conservation day on 14-12-2021. all the faculty and students of ttwrdc(b) manuguru participated on the program. faculty members explained the uses of energy conservation to next generations

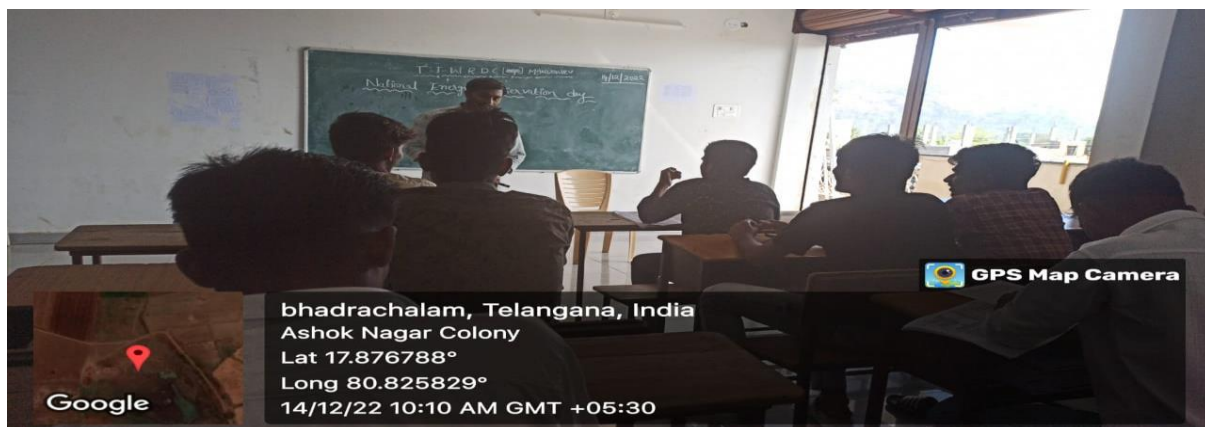

department of physics conducted earth day on 22-04-2022. all the faculty and students of ttwrdc(b) manuguru participated on the program. faculty members explained the resources on the earth and its uses

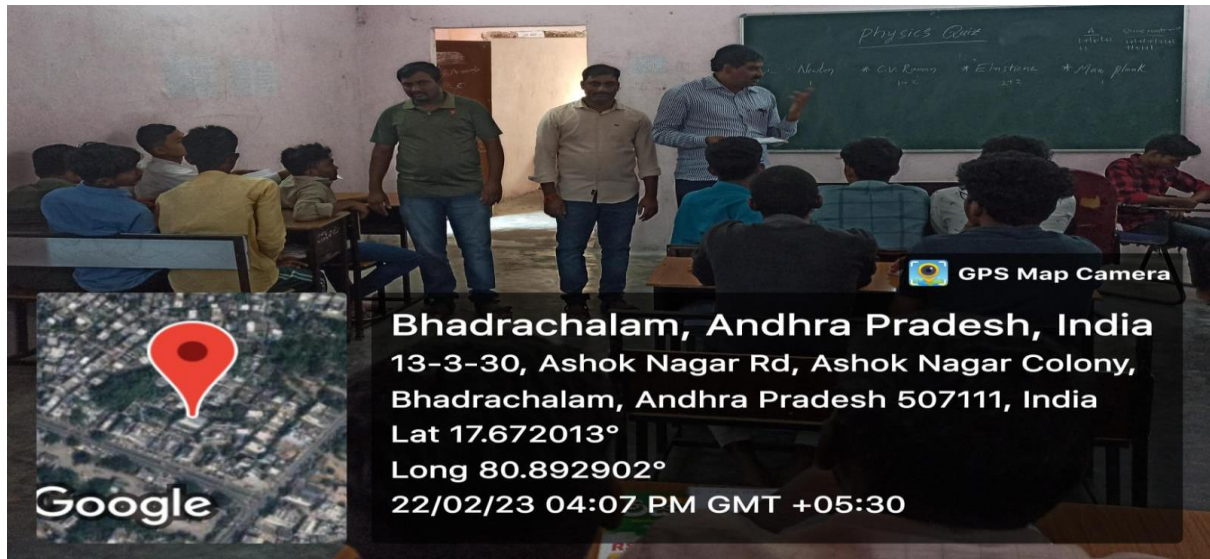

department of physics conducted international science day on 10-11-2022. all the faculty and students of ttwrdc(b) manuguru participated on the program. science faculty members explained the recent developments in science and peace among the countries

department of physics conducted national energy conservation day on 14-12-2022. all the faculty and students of ttwrdc(b) manuguru participated on the program. faculty members explained the uses of energy conservation to next generations

department of physics conducted national science day on 22-02-2023. all the faculty and students of ttwrdc(b) manuguru participated on the program. science faculty members explained the new trends and Indians recent achievements in science and conducted quiz program

department of physics conducted meteorological day on 23-03-2023. physics faculty and students of BSc (MPC & MCPc's) participated on the program. physics faculty explained meteorology, hydrological changes.
